

hello!

I'm Julia Klawitter.

I am a textile designer in my twelfth semester at the State Academy of Fine Arts in Stuttgart.

In my designs I love to take my inspirations further and turn them into handmade fabrics. In doing so, I like to be playful and creative.

For me, a textile is something that constantly surrounds us and should therefore be something that brings us joy and that one likes to have around. That is my motivation, to give people pleasure with fabrics and give them a benefit.
